### FOR IMMEDIATE RELEASE

## Engineering Firms Merge to Bring Comprehensive Services to Delmarva and Pennsylvania

**New Castle, DE, November 19, 2009**—Landmark Engineering, Inc., one of the largest civil engineering firms in the region, and JCM Environmental Consultants Inc., one of the most diverse environmental consulting firms in the area, announced a merger today. The merger of the two Delaware-based firms will create a stronger corporation that will provide professional services across the disciplines of civil and environmental engineering, environmental remediation, environmental sciences, and green building and development.

“We are happy to now be able to provide a full spectrum of services to our clients,” said Ted C. Williams, PE, Executive Vice President of Landmark. The company is among the largest specialist firms of its type in the region. Founded in 1987, it provides professional quality surveying, engineering, planning and design services for civil and site engineering projects. In addition to providing sustainable site design, the firm also offers services ranging from site analysis/due diligence and schematic design, through design development, construction documents, cost estimates, assistance in obtaining permits and construction phase support. Landmark recently received a Marvin S. Gilman Superstars in Business Award from the Delaware State Chamber of Commerce.

JCM Environmental is a full-service environmental consulting firm offering a range of services, from due diligence through open space turnover to site environmental maintenance and management. “We have continued to add services and grow,” said Jim McCulley, founder and manager of JCM Environmental. “Joining forces with Landmark will lead to practical, innovative and unique solutions that will make all our clients’ projects more successful while providing for sound economic development that protects the environment.”
